

Summer Lunch & Learn Speaker Series

**THURSDAY, JULY 9
12:00PM EST
COE A115**

Priscilla Ejimofor

BUSINESS ANALYST AND PROJECT MANAGER, FLORIDA POWER & LIGHT

PRISCILLA EJIMOFOR is a Business Analyst and Project Manager at Florida Power & Light (FPL), where she contributes to critical initiatives that support the delivery of reliable, efficient, and innovative energy solutions across the state. She brings extensive experience in program coordination, project execution, and operational improvement, playing a key role in advancing FPL's mission to provide dependable service to its customers. With a strong foundation in both technical and business operations, Priscilla has successfully led and supported initiatives that enhance organizational performance, strengthen service delivery, and improve customer

outcomes. Her work is distinguished by a commitment to excellence, strategic problem-solving, and continuous improvement within the energy sector.

Priscilla holds a degree in Industrial Engineering from the University of Florida, where she developed the analytical and problem-solving foundation that supports her work in project management, data-driven decision-making, and energy systems.

Priscilla is actively engaged in community outreach and STEM education initiatives.

ABOUT THE LUNCH & LEARN SERIES

The lunch and learn (LNL) series was designed for FAMU-FSU College of Engineering collegiate participants in the ECE Summer Research Mentoring Program and our ACEE high school participants to learn more about various STEM careers and research. Lunches are sponsored by the ECE Education and Outreach Committee. This event cultivates a sense of community and networking environment between students and industry partners including KCNSC/Honeywell, Intel, Texas Instruments, ORETTTC, PNNL, LANL, FPL, Boeing, etc. During lunches, guest speakers will engage with participants virtually providing career awareness, academic preparedness, and/or skill development. **Scan to register to attend here:**
